EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Lisa Hillman on September 27, 2004.

The application has been amended as follows:

a.) In claim 59, line 1, after "vessel", inserted -- is --.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following U.S. Patents disclose diffraction grating devices:

4,289,371; 5,738,825; 6,449,097; and 6,707,561

3. The following is an examiner's statement of reasons for allowance:

The closest prior art method is disclosed in U.S. Patent 6,449,097. Patent '097 discloses a method for making a diffraction grating for wavelength division multiplexing/demultiplexing devices. The diffraction grating comprises a glass substrate, a polymer grating layer located adjacent to the glass substrate, and a metal coating layer located adjacent to the polymer grating layer. The polymer grating layer can be

composed of an epoxy material. The polymer grating is typically replicated from a master diffraction grating. However, patent '097 does not teach immobilizing one or more specific binding substances on the grating to produce a biosensor as set forth in the instant invention. Patent '097 does not teach or suggest using the disclosed diffraction grating in or as a biosensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
